📍 Punjab, Pakistan

BSCS student at COMSATS University with practical software engineering experience in **Java, Spring Boot, REST APIs, database architecture, React, and Next.js** through internships and production-focused projects. Dedicated to engineering resilient backend systems, scalable APIs, and clean full-stack web applications.

EXPERIENCE

Java Developer Intern

6-Week Internship

Warmbytes Private Limited

- Backend Architecture:** Developed core backend features and robust RESTful APIs using **Java** and **Spring Boot** for core application modules.
- Data Persistence:** Utilized **Spring Data JPA** for database operations, entity relationship mapping, and persistence optimization.
- API Integration:** Documented, integrated, and verified RESTful endpoints within established architectural standards and agile sprint cycles.

Full Stack Developer Intern

Internship

Xappo Enterprises

- Frontend Engineering:** Built responsive web interfaces and dynamic application features utilizing **React** and modern web tooling.
- API Synchronization:** Connected frontend UI components with backend APIs for real-time data handling and clean state management.
- Team Collaboration:** Maintained disciplined version control workflows using **Git & GitHub**, participating in iterative code reviews.

TECHNICAL EXPERTISE

Backend Core

Java

Spring Boot

Spring Data JPA

Spring Security

REST APIs

Frontend & UI

React

Next.js

HTML5 & CSS3

Tailwind CSS

Databases & Tooling

PostgreSQL

MongoDB

Git & GitHub

Agile / Scrum

FEATURED PROJECTS

Inventory Management System

Java • Spring Boot • REST APIs

Developed a comprehensive backend system for managing stock inventories, product catalogs, supplier records, and business transactions through secure RESTful endpoints.

AI Career Advisor

Next.js • Tailwind CSS • AI

Built an interactive career guidance web platform featuring an AI conversational chatbot and a responsive Next.js interface for personalized career recommendations.

Hospital Management System

ReactJS • MongoDB • Node.js

Engineered a full-stack healthcare web portal for organizing patient registrations, appointments, medical records, and clinical administrative workflows.

EDUCATION

BS in Computer Science

COMSATS University

Currently Pursuing • Expected 2028

Key Coursework:

Data Structures, OOP (Java), Database Systems, Web Tech, Software Engineering.

CORE STRENGTHS

- ✓ RESTful API Architecture
- ✓ Object-Oriented Design
- ✓ Microservices Concepts
- ✓ Relational Data Modeling
