

Computer Science student at COMSATS (3.8 CGPA) with expertise in the JavaScript/TypeScript ecosystem. Specialized in building high-performance web applications with Next.js and cross-platform mobile solutions using React Native. Focused on clean architecture and intuitive UI/UX design.

TECHNICAL PROJECTS

Food Delivery Platform

2026

Next.js | MongoDB | Tailwind CSS

Developed a full-stack system with real-time menu tracking, secure checkout, and a responsive dashboard for seamless user interaction.

Hospital Management System

2026

Next.js | NoSQL | API Design

Architected a secure administrative portal for managing healthcare workflows, including patient records and scheduling algorithms.

Health Guide Mobile App

2026

React Native | Redux

Engineered a cross-platform app providing personalized wellness tracking and health insights using native device features.

CPU Scheduler Simulator

2025

Java | OOP | Data Structures

Academic simulation of OS scheduling algorithms (FCFS, Priority) to visualize CPU utilization and process wait times.

Personal Portfolio Website

2025

React.js | Framer Motion

Interactive personal brand site with custom animations and dynamic routing, achieving high performance and SEO scores.

EDUCATION

BS in Computer Science

Present

COMSATS University Islamabad (Attock)

Academic Excellence: **3.8 / 4.00 CGPA**. Expertise in Algorithms, Database Systems, and Web Engineering.

HSSC (Pre-Medical)

2022

Score: 950/1100 (86.36%).

TECHNICAL STACK

Next.js

React.js

React Native

TypeScript

Node.js

Python

Java (OOP)

MongoDB

SQL

Git/GitHub
